# WICKER SERIES

## 柳条系列

The biggest feature of the wicker series is the realistic and disordered particle nodules, with the background color of natural simulation, it is extremely close to real wicker. The craftsmanship of the big and small rattan makes the product achieve a visual effect of fake and real.

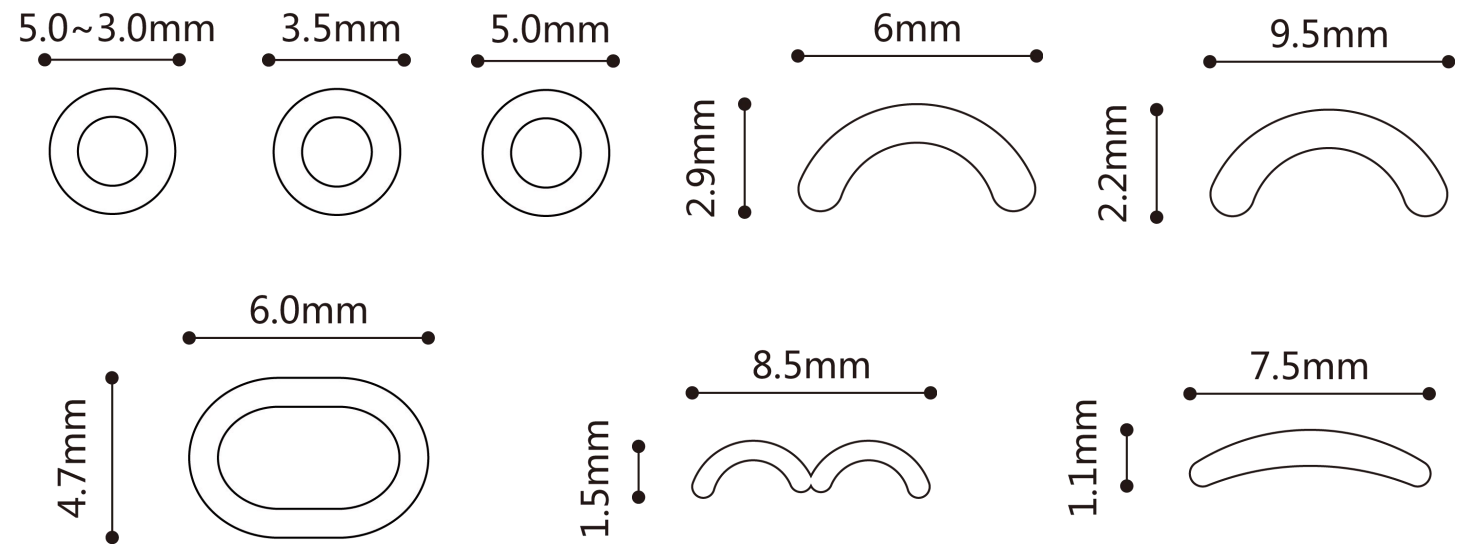

The series has a total of 5 colors and two effects.

The yellow imitation wicker effect is closer to wicker, And other gray, brown imitation wicker is to imitate the effect of weathered wood.

And another effect - the lime effect, it has an aged effect, matte and natural, like a layer of limewater on the rattan.
