Bling Bling SERIES

——APPEAR IN THE LIMELIGHT

At Christmas, are you still worried about choosing the decoration material? AGO Bling Bling series, to overcome the surface of the decorative tape on the market is easy to fall off the powder problem, using a special process to ensure that the decorative tape is not easy to fall off the color, so that the sparkle is more long-lasting!

This decorative tape is also easy to shape, whether it is a Christmas deer, rattan circles, decorated flowers, lights, or a festive surprise box, it can be easily managed!

Its rotating design not only adds saturation and three-dimensionality to the product, but also makes it a dazzling focal point in the decoration, truly showing the magic of Bling Bling~!

Carbon Wood Series

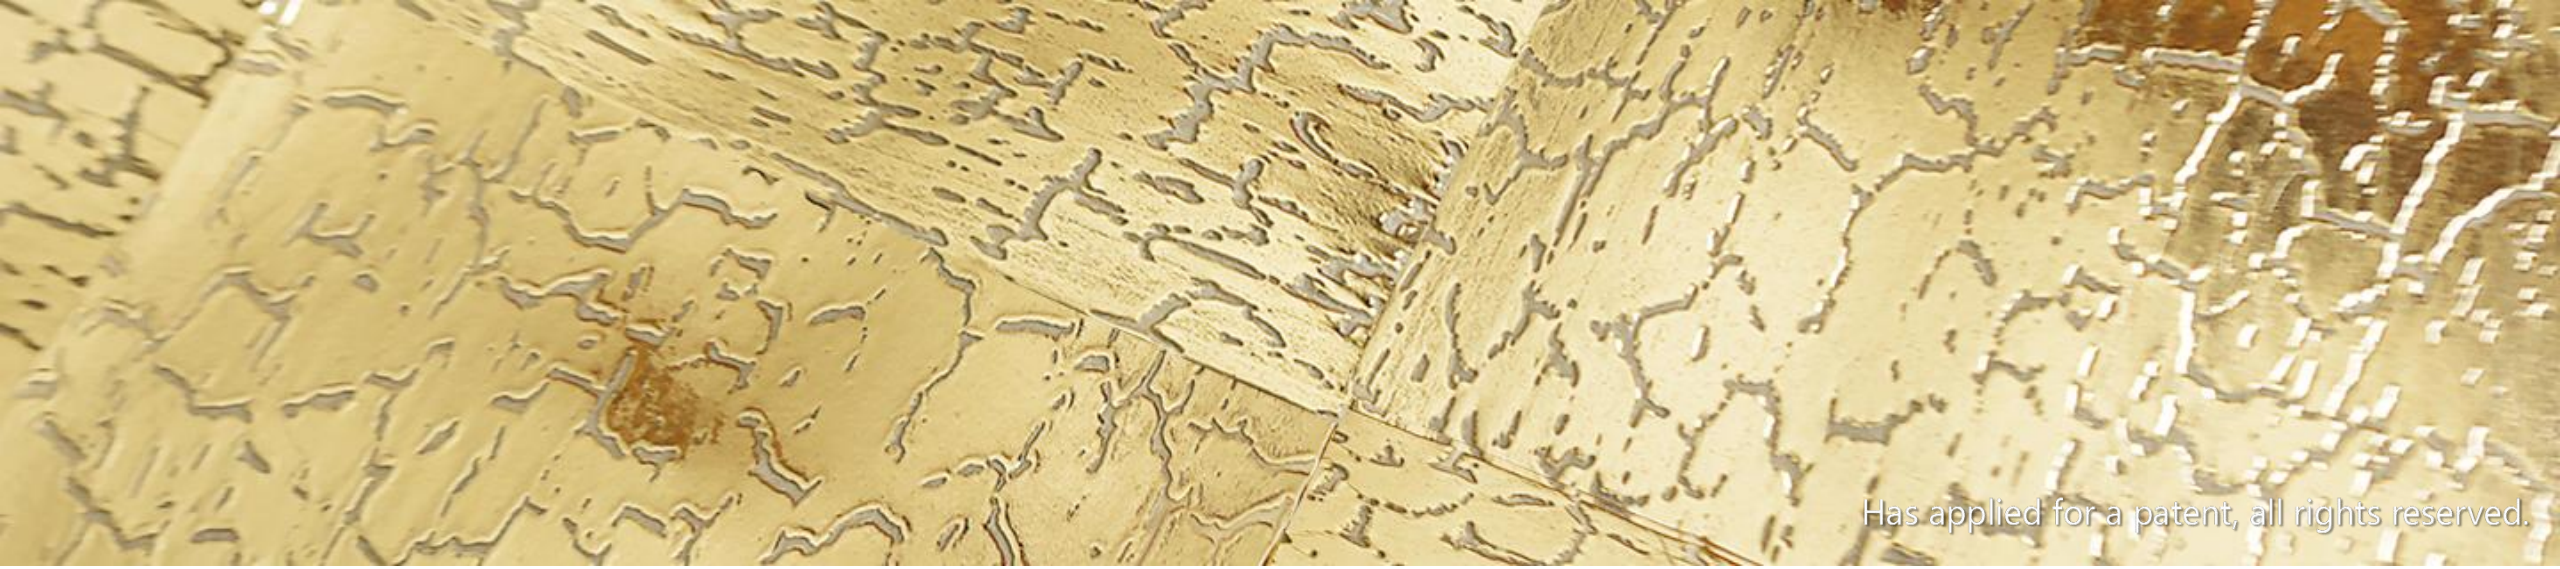

Gilded Carbon Wood Series — “Translucent Carbon Wood Grain + Gilded Luster Texture”

Crafted with innovative technology, this material combines a translucent carbon wood grainwith a gilded luminous finish, redefining the light-and-shadow aesthetics of high-end decorative materials. The translucent wood-grain design allows light to pass through naturally, creating a lively and layered visual effect, much like natural wood illuminated from within. The surface also features a delicate reflective sheen, available in Gold, Champagne, and Silver tones, where natural textures blend seamlessly with a light luxury style.

Gilded Carbon Wood offers strong toughness and flexibility, making it resistant to breakage while remaining easy to bend and shape. With convenient processing and a high finished-product yield, it is widely suitable for applications such as lighting fixtures, decorative screens, festive decorations, and premium storage products, perfectly complementing a variety of modern and light luxury design styles.

56-A15 Gold 100×0.6

56-A16 Silver 100×0.6

56-A17 Champagne Gold 100×0.6

56-ABling Bling Series

56-ABlingBling

The BlingBling series is covered with three-dimensional crack embossing technology on the surface, with a high-end and delicate texture. It presents a warm and soft luster under light, with a staggered texture and rich visual layers.

It not only avoids the problems of heavy and easily oxidized traditional metals, but also has a more visual level than ordinary plastic strips.

It not only has outstanding appearance, but also has the practical feature of being easy to tear by hand - it can be easily divided into two parts along the pattern without tools, and the edges are smooth and not rough. The texture is flexible but not easy to break, waterproof and moisture-proof, long-lasting and non fading, and can be widely used in lighting styling, storage, holiday decoration and other scenes, easily creating a light luxury atmosphere.
