28A-A CONVENTIONAL SERIES

28A-A综合系列

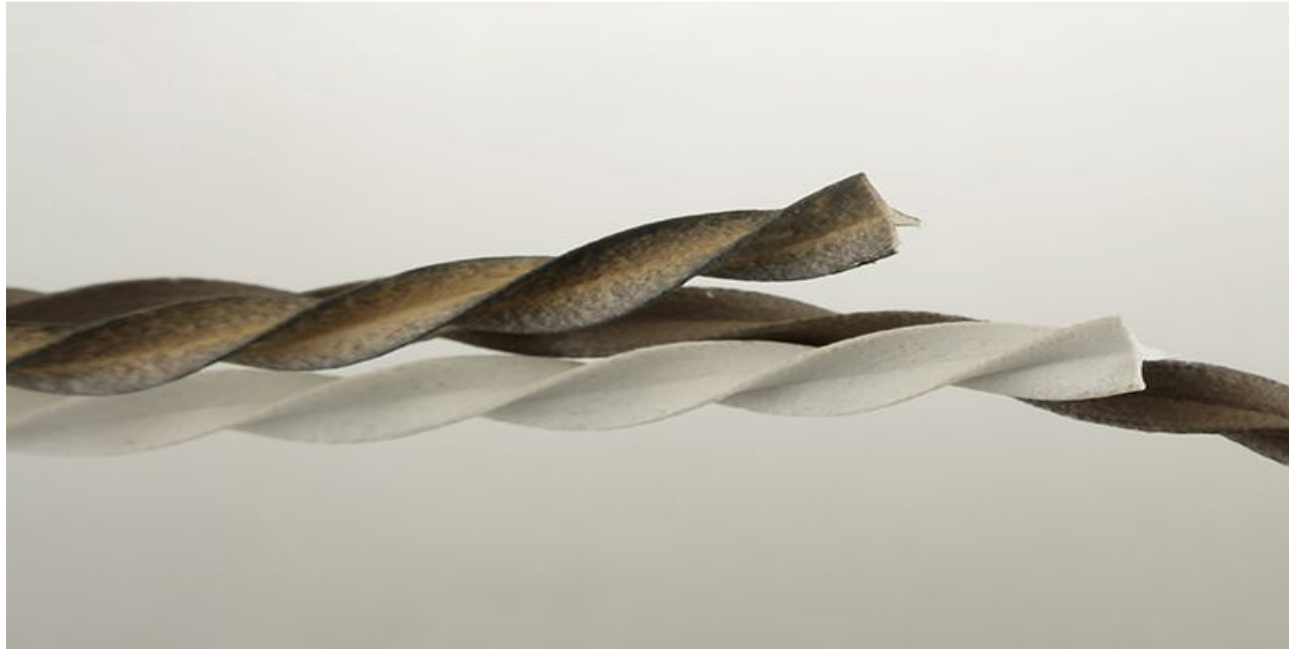

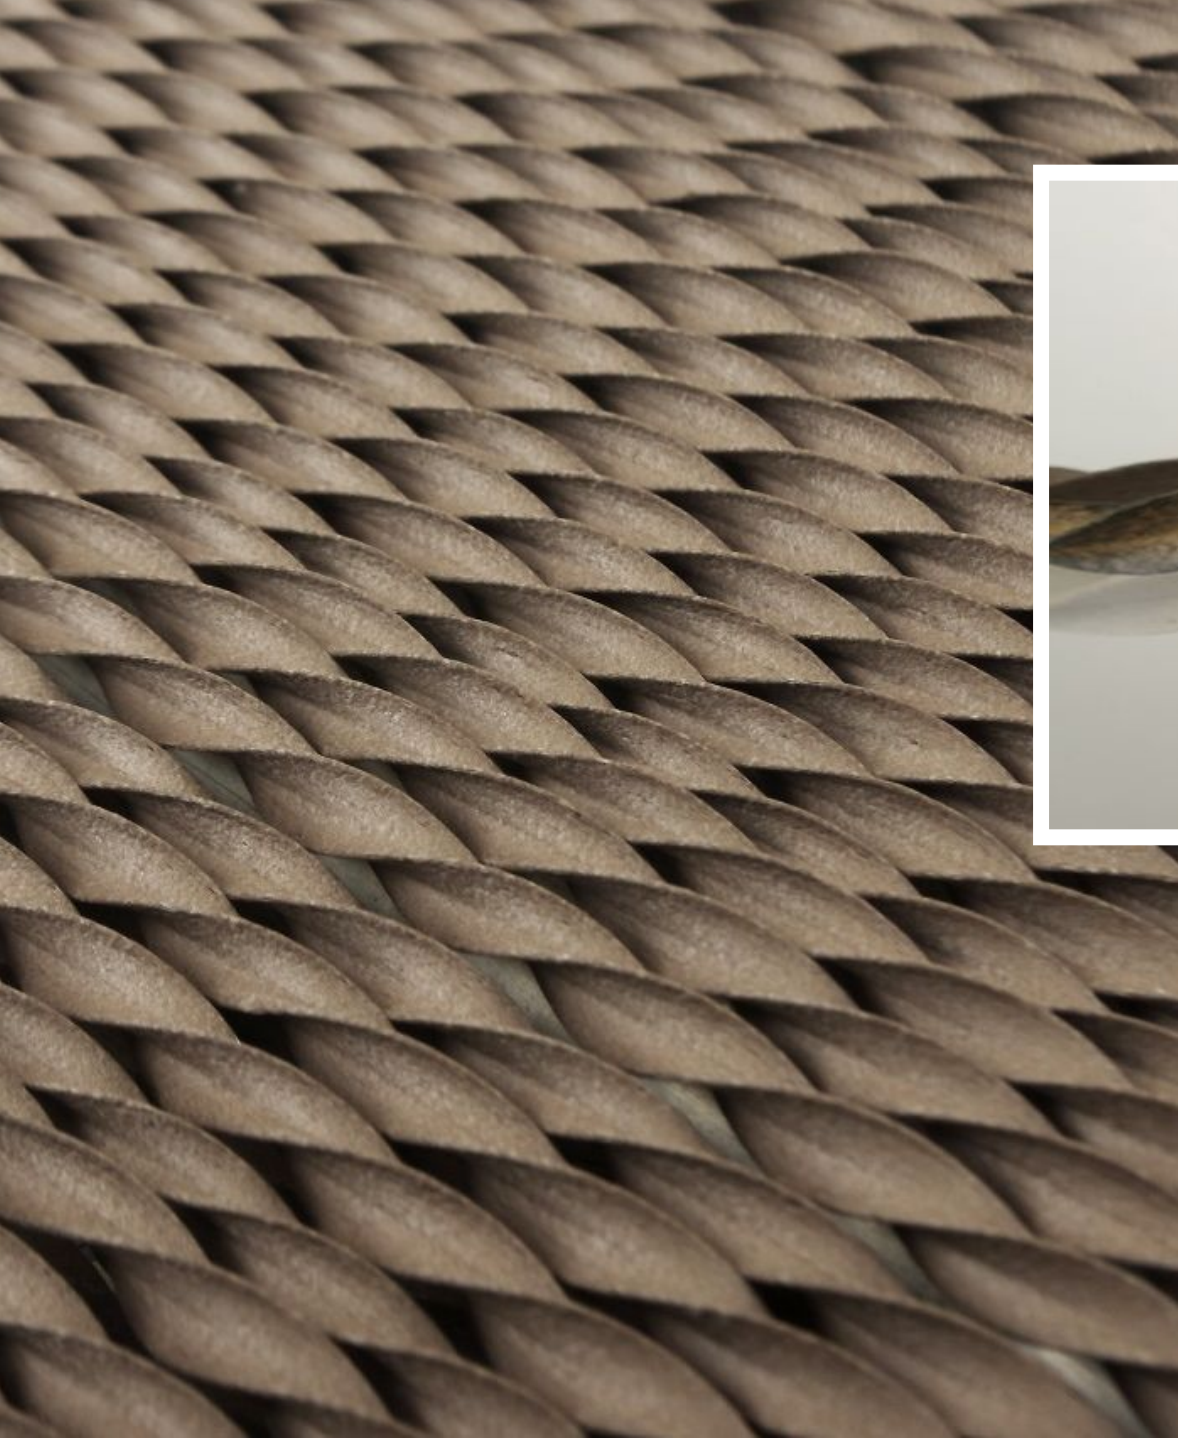

The 28A-A comprehensive series is inspired by nature. The design takes cues from the branches of the plant *Hylocereus* (commonly known as the night-blooming cactus) to shape the rattan strips.

Featuring a triangular prism-shaped rattan structure with a twisted design, it forms a unique three-dimensional pattern. As the viewing angle shifts, the rattan strips present different visual effects, making the woven surface dynamic and full of variation.

This series shares a similar concept with the floral panel series. However, compared to the floral panel structure, the triangular prism design offers a more uniform twist and greater stability.
