TOAD VINE

Toad vine , a kind of vine plant, has a natural curling characteristic, which makes it a mainstream material for making rattan hoops and birdhouses.AGO implanted PE elements into the toadstools, giving them more color choices and adding active colors to the finished products. In terms of performance, we have improvedthe hard and brittle qualities of the natural toadstools, so that our toadstools are more easy to shape, which brings unlimited possibilities for holiday decorations and landscape designs,and the materials are waterproof, mildew-proof, and moth-proof, which is a worry-free experience for the consumers!

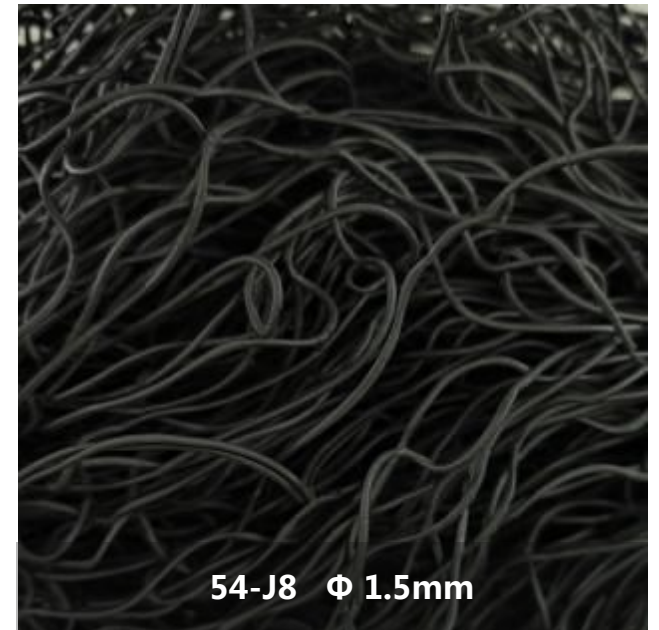

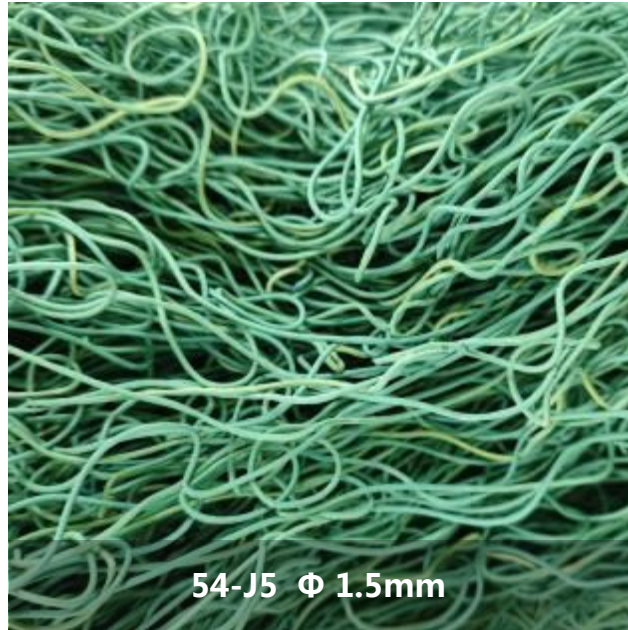

Has applied for a patent, all rights reserved.
