

NEW PRODUCT PROMOTION 2025

31-A ROUND RATTAN

31-A 圆藤

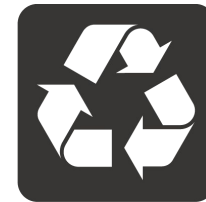

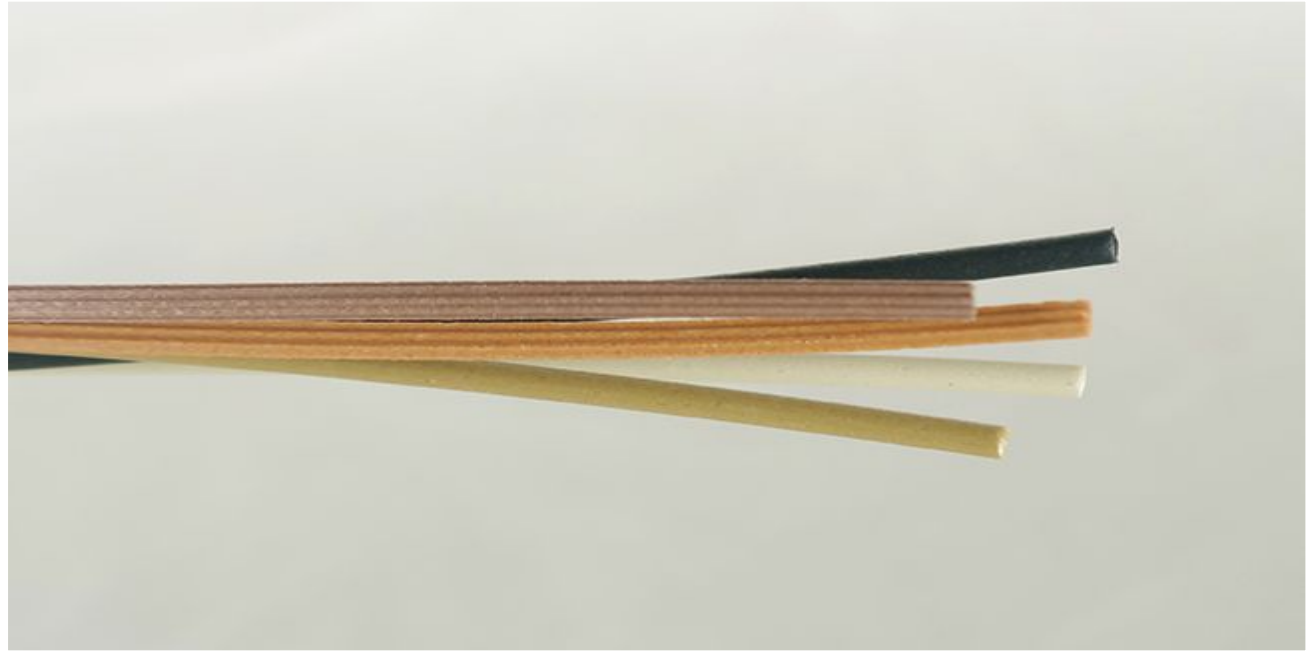

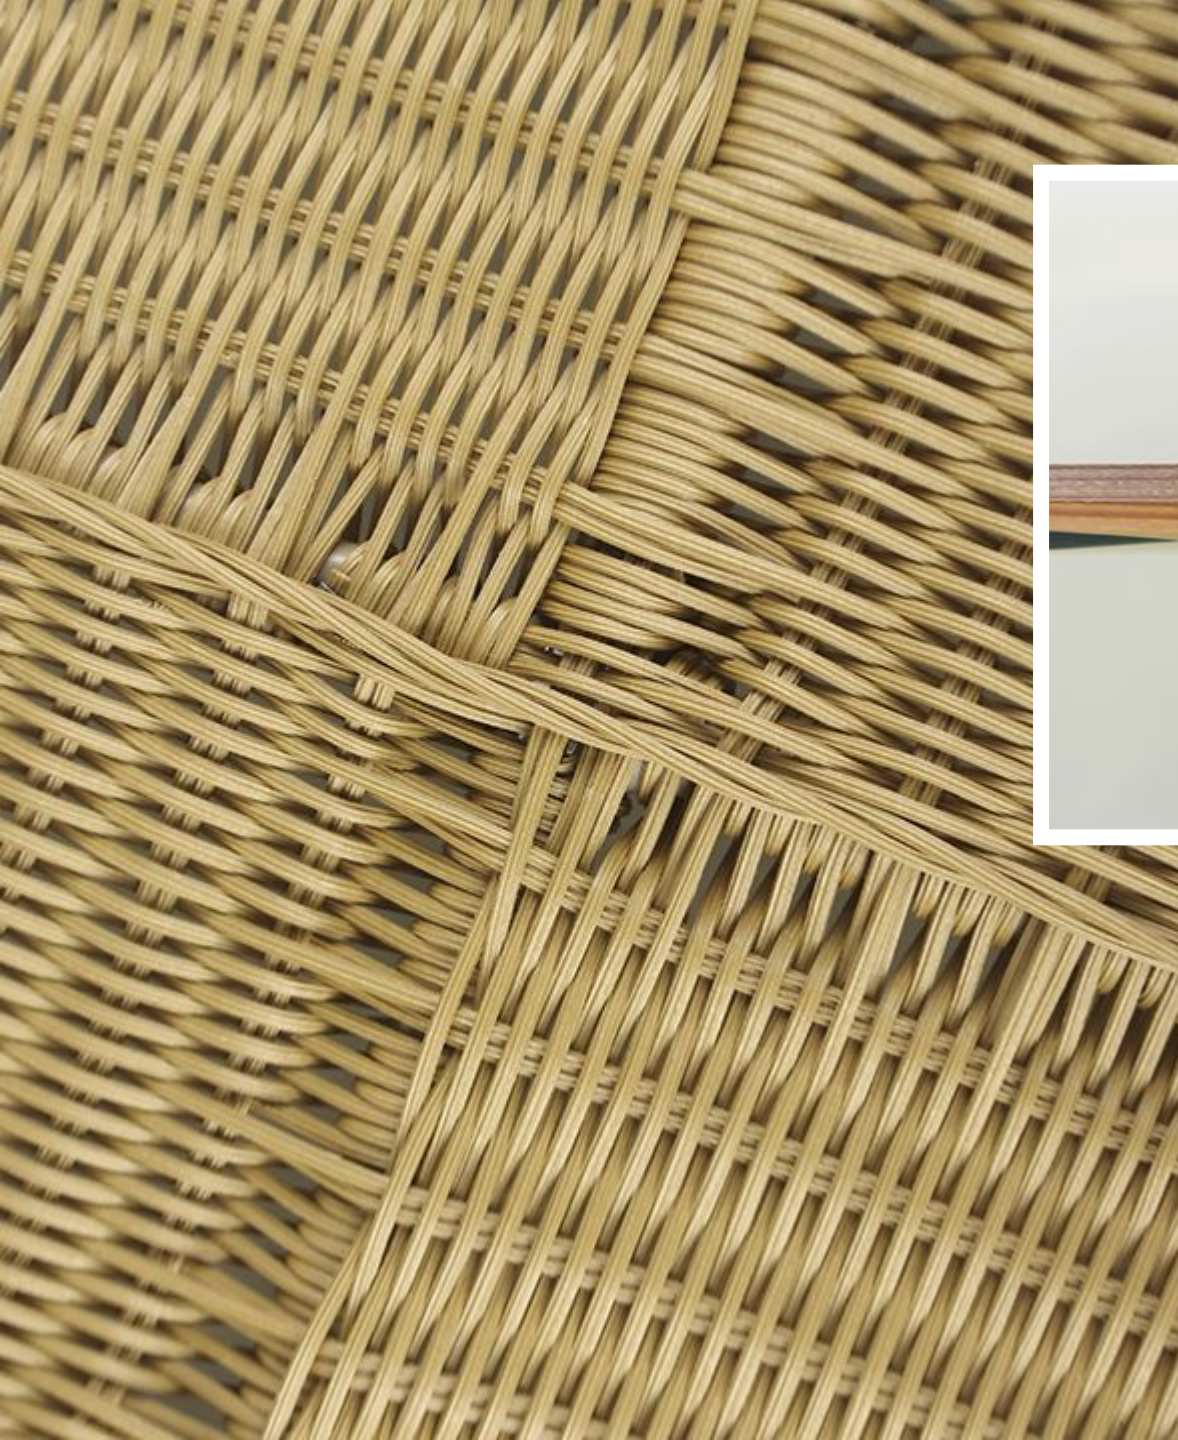

Plastic round rattan, renowned for its realistic natural texture and elegant arched profile, stands as a classic choice in modern décor. It meticulously replicates the rustic charm of natural rattan strands while overcoming the drawbacks of traditional rattan—such as fading and cracking—boasting superior properties like waterproofing, mold resistance, and UV resistance. Suitable for both indoor and outdoor use, it ensures lasting durability and enduring freshness.

Its lightweight and flexible material allows free bending and shaping, making it ideal for diverse designs including furniture, screens, and lighting fixtures. It effortlessly complements both natural countryside styles and modern spaces. Requiring no special maintenance, daily cleaning is as simple as wiping clean, allowing you to effortlessly maintain an eternally stylish natural aesthetic.

This classic design stems from a profound understanding of natural aesthetics. Plastic simulated round rattan employs technology to recreate nature and embodies timeless quality through superior craftsmanship. It is the optimal choice for those seeking an elegant and practical solution.
