SERE VINES SERIES

枯藤系列

The Sere Vines series is a new technical attempt of AGO. Researchers use cross-border thinking, applied to the imitation rattan, the collision has a surprising effect.

Rough and irregular surface texture is the biggest feature of this series. This series of natural simulation effects. In addition to the extremely realistic effects, the series also have the characteristics of waterproof, strong and so on, which is very suitable for the weaving of decorative supplies.

SERE VINES SERIES

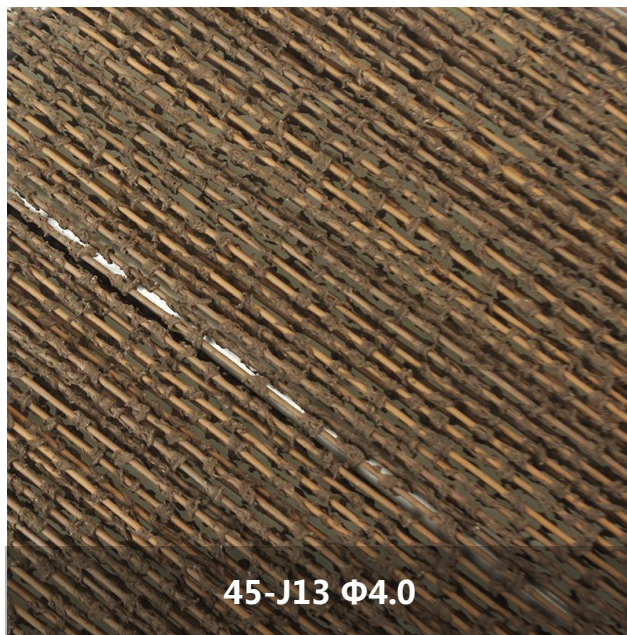

枯藤系列

This collection offers two styles. The first style features bold, eye-catching granules. The second finish features tighter, more subdued granules. These textures transform not just artisanal crafts, but woven screens and even furniture into eye-catching.
