PROMOTION **2026**

Tracewood Series

Tracewood Series materials are crafted with advanced three-dimensional techniques to replicate the warm, natural feel of rattan, while also delivering the texture of solid wood with rich, layered depth.

This series is presented in flat strip form, offering excellent flexibility and resistance to bending. It supports complex processes such as three-dimensional weaving, curved wrapping, bending, and splicing. Once woven, the structure remains firm and resistant to loosening or deformation, ensuring long-term stability of the final product.

It is ideal for three-dimensional weaving in rattan furniture and for creating curved forms in lighting designs.
